INDEX TO VOL. XIII (A)

AUTHORS' INDEX

Ali, S. Ashroff, Desai, R. D., and Shroff, H. P. — Heterocyclic compounds, Part XIII, 184.

Ananthakrishnan, S. V., and Pasupati, V. — Substitution in polycyclic systems. Part II, 211.

Bajpai, R. R., and Vaidhianathan, V. I. — On the preparation of quartz ultrasonic oscillators, 504.

Balakrishnan, T. A. S. .. — An elementary theory of the coronas of water-droplets, 188.

Barve, P. M. .. — *See* Vora and others.

Bhabha, H. J. .. — Note on the correspondence between the classical and quantum theories of neutral mesons, 249.

Bhabha, H. J., and Rao, B. S. Madhava — The scattering of charged mesons, 9.

Bhagavantam, S. .. — Raman effect in relation to crystal structure: Lattice oscillations, 543.

Bhagavantam, S., and Bhimasenachar, J. — Modified reflection of X-rays: Naphthalene, 266.

Bhat, R. V. .. — Adaptation of the Micro-Kjeldahl method to the estimation of nitrogen in organic compounds containing nitro and azo groups, 269.

Bhimasenachar, J. .. — *See* Bhagavantam and Bhimasenachar.

Bokil, K. V., and Nargund, K. S. — Syntheses in the chaulmoogric acid series, Part III, 233.

Chalam, E. V. .. — *See* Nath and Chalam.

Chiplonkar, V. T. .. — Rectification in discharge tubes—Part II, 323.

Deliwala, C. V., and Shah, N. M. — Aluminium chloride, a new reagent for the condensation of β-ketonic esters with phenols. Part V, 352.

Desai, B. N. .. — *See* Vora and others.

Desai, R. D. .. — *See* Ali and others.

Desai, R. D., and Hamid, Abdul — Studies in naphthalene series. VIII, IX, 126, 132.

Desai, R. D., and Waravdekar, W. S. — Studies in naphthalene series. Part VII, 39. Heterocyclic compounds. Part XII, 177.

Desai, R. D., Hamid, Abdul, and Shroff, H. P. — Studies in naphthalene series. Part VI, 33.

Deshpande, J. S. .. — *See* Hirwe and Deshpande.

Dharam Das, Ione Nitravati, and Tewari, J. D. — The effect of unsaturated chromophores on pyronine dyestuffs. Part II, 68.

Dharmatti, S. S. .. Magnetism and molecular structure of sulphur compounds, 359.

Dixit, K. R. .. Effect of admixture of silver on the rectifying properties of Cu-Cu_2O cells, 498.

Ganapathi, K. .. Chemotherapy of bacterial infections. Part IV, 386.

Gavankar, (Miss) K. D. *See* Hirwe and others.

Gupta, Hansraj .. An important congruence, 85.
Some idiosyncratic numbers of Ramanujan, 519.

Hamid, Abdul .. *See* Desai and Hamid.
See Desai and others.

Hirwe, N. W., and Deshpande, J. S. Studies in chloral amides. Part VIII, 275; Part IX, 277.

Hirwe, N. W., and Kulkarni, P. Y. Studies in chloral amides—Part VII, 49.

Hirwe, N. W., and Patil, B. V. Studies in chloral amides. Part VII, 273.

Hirwe, N. W., Gavankar, (Miss) K. D., and Patil, B. V. Studies in chloral amides. Part X, 371.

Iyer, K. S. Sankarasubba *See* Rao and Iyer.

Ittyerah, P. I., and Pandya, K. C. Condensation of malonanilic acid with aldehydes. Part II, 119; Part II, 122; Part IV, 461.

Joglekar, S. Y. .. *See* Ramdas and Joglekar.

Krishnan, K. G. .. Dispersion of ultrasonic velocity in organic liquids, 281.

Krishnaswamy, B., and Seshadri, T. R. Synthetic experiments in the benzo-pyrone series. Part III, 43.

Kulkarni, P. Y. .. *See* Hirwe and Kulkarni.

Murti, P. Bhaskara Rama A study of the chemical components of the roots of *Decalepis Hamiltonii* (makali veru). Part II, 263.
Paper pulp from annual crops. Part II, 564.

Murti, P. Bhaskara Rama, and Seshadri, T. R. A study of the chemical components of the roots of *Decalepis Hamiltonii* (makali veru). Part I, 221; Part II, 399.
The glycosidic components of the flowers of *Butea frondosa*, 395.

Murty, G. V. L. N. .. Ferric chloride as a permanent standard in the colourimetric estimation of nitrate, 116.

Narayanamurti, D., and Ranganathan, V. The thermal conductivity of Indian timbers. Part I, 300.

Nargund, K. S. .. *See* Bokil and Nargund.

Narlikar, V. V. .. A classical limit of heavy homogeneous spherical masses, 240.

Nath, N. S. Nagendra, and Chalam, E. V. The intensities of the Raman lines in carbon dioxide, 339.

Nayar, P. G. N. ..	Temperature variation of the Raman frequency of diamond, 284.
	Luminescence, absorption and scattering of light in diamonds: Part I, 483; Part II, 534.
Nedungadi, T. M. K. ..	Effect of crystal orientation on the Raman effect in naphthalene and benzophenone, 161.
Neelakantam, K. ..	Determination of lead permanganometrically (Low's method), 108.
Neelakantam, K., and Row, L. Ramachandra	The lanthanum nitrate test for acetate in inorganic qualitative analysis, 194.
Norris, R. ..	The Raman spectrum and the specific heat of crystalline sulphur, 291.
Pandya, K. C. ..	*See* Ittyerah and Pandya.
Paramasivan, S. ..	Electrolytic restoration of bronze statues and inscribed copper plates, 53.
	Investigations on ancient Indian metallurgy. I, 87.
Pasupati, V. ..	*See* Ananthakrishnan and Pasupati.
Patil, B. V. ..	*See* Hirwe and others.
	See Hirwe and Patil.
Pillai, S. S. ..	On the sum function connected with primitive roots, 526.
	On M consecutive integers—III, 530.
Rajagopalan, S. ..	Synthetical experiments in the group of sympathomimetics. Part II, 566.
Raman, C. V. ..	Crystals and photons, 1.
Ramdas, L. A., and Joglekar, S. Y.	Studies on thermal repulsion, 374.
Ram, Gurdas, and Vaidhianathan, V. I.	On capillary forces in natural soils, 77.
Ranganathan, V. ..	*See* Narayanamurti and Ranganathan.
Rangaswami, S., Seshadri, T. R., and Venkateswarlu, V.	The remarkable fluorescence of certain coumarin derivatives, 316.
Rao, B. S. Madhava ..	*See* Bhabha and Rao.
Rao, D. A. A. S. Narayana	Raman effect in gypsum, 137.
Rao, K. Ranganatha, and Seshadri, T. R.	Synthesis of 7-hydroxy-5-methylcoumarin, 255.
Rao, S. Ramachandra, and Iyer, K. S. Sankarasubba	Photoelectric efficiency of ferromagnetic metals at different temperatures in the soft X-ray region, 411.
Rao, V. Subba, and Seshadri, T. R.	Chemical investigation of Indian lichens. Part III, 199.
Row, L. Ramachandra ..	*See* Neelakantam and Row.
Row, L. Ramachandra, and Seshadri, T. R.	Pyrilium salts derived from 4-O-methyl resorcylic aldehyde, 510.

Saksena, B. D. .. Raman spectrum of gypsum, 25.

Sarkar, T. C. .. The lead ratio of a crystal of monazite from the Gaya District, Bihar, 245.

Seshadri, T. R. .. *See* Krishnaswamy and Seshadri.
See Murti and Seshadri.
See Rangaswami and others.
See Rao and Seshadri.
See Row and Seshadri.

Seshadri, T. R., and Venkateswarulu, V. Synthetic experiments in the benzopyrone series. Part IV, 404.

Seth, B. R. .. On the gravest mode of some vibrating systems, 390.

Seth, I. D. .. Reflection and refraction of attenuated waves in semi-infinite elastic solid media, 151.

Shabbar, Mohammad .. On the existence of a metric for path spaces admitting the Lorentz group, 203.

Shah, N. M. .. *See* Deliwala and Shah.

Shastri, N. A. .. Some relations between Bessel functions of third order and confluent hypergeometric functions, 521.

Shroff, H. P. .. *See* Desai and others.
See Ali and others.

Subrahmanian, R. V. .. The spectral character of reflection by a regularly stratified medium: Part I, 467.

Sunanda Bai, K. .. Depolarisation of light scattered by liquids, 439.

Tewari, J. D. .. *See* Dharam Dass and Tewari.

Vaidhianathan, V. I. .. *See* Ram and Vaidhianathan.
See Bajpai and Vaidhianathan.

Vaidyanathaswamy, R. .. The ideal-theory of partially ordered set, 94.

Venkataraman, R. .. The kinetics of the olefin-bromine reaction. Part III, 259.

Venkateswarlu, K. .. Relative intensities of Stokes and anti-Stokes Raman lines in crystals, 64.

Venkateswarlu, V. .. *See* Rangaswami and others.
See Seshadri and Venkateswarlu.

Vora, V. C., Barve, P. M., and Desai, B. N. Importance of dialysis in the study of colloids. Part VII, 100.

Waravdekar, W. S. .. *See* Desai and Waravdekar.

TITLE INDEX

Acetate in inorganic qualitative analysis, lanthanum nitrate test (Neelakantam and Row), 194.

Aluminium chloride, a new reagent for the condensation of β-ketonic esters with phenols, V (Deliwala and Shah), 352.

Benzo-pyrone series, synthetic experiments, III (Krishnaswamy and Seshadri), 43; IV (Seshadri and Venkateswarlu), 404.

Bessel functions of third order and confluent hypergeometric functions, some relations between (Shastri), 521.

Butea frondosa, flowers, the glycosidic components (Murti and Seshadri), 395.

Capillary forces in natural soils (Ram and Vaidhianathan), 77.

Chaulmoogric acid series, syntheses, III (Bokil and Nargund), 233.

Chemotherapy of bacterial infections, IV (Ganapathi), 386.

Chloral amides, studies, VII (Hirwe and Kulkarni), 49; VII (Hirwe and Patil), 273; VIII, IX (Hirwe and Deshpande), 275, 277; X (Hirwe and others), 371.

Chromophores, unsaturated, the effect, on pyronine dyestuffs, II (Dass and Tewari), 68.

Classical limit of heavy homogeneous spherical masses (Narlikar), 240.

Colourimetric estimation of nitrate, ferric chloride as a permanent standard (Murty), 116.

Congruence, important (Gupta), 85.

Coronas of water droplets, an elementary theory (Balakrishnan), 188.

Crystals and photons (Raman), 1.

Decalepis Hamiltonii (makali veru), roots, a study of the chemical components I, III (Murti and Seshadri), 221, 399; II (Murti), 263.

Depolarisation of light scattered by liquids (Sunanda Bai), 439.

Dialysis, importance, in the study of colloids, VII (Vora and others), 100.

Diamonds, luminescence, absorption, and scattering of light, I, II (Nayar), 483, 534.

Electrolytic restoration of bronze statues and inscribed copper plates (Paramasivan), 53.

Fluorescence, remarkable, of certain coumarin derivatives (Rangaswami and others), 316.

Gravest mode of some vibrating systems (Seth), 390.

Heterocyclic compounds, XII (Desai and Waravdekar), 177; XIII (Ali and others), 184.

Ideal-theory of the partially ordered set (Vaidyanathaswamy), 94.

Integers, M consecutive, III (Pillai), 530.

Kinetics of the olefin-bromine reaction, III (Venkataraman), 259.

Lead, determination, permanganometrically (Low's method) (Neelakantam), 108.

Lead ratio of a crystal of monazite from the Gaya District, Bihar (Sarkar), 245.

Lichens, Indian, chemical investigation, III (Rao and Seshadri), 199.

Magnetism and molecular structure of sulphur compounds (Dharmatti), 359.

Malonanilic acid, condensation, with aldehydes, II, III, IV (Ittyerah and Pandya), 119, 122, 461.
Mesons, charged, the scattering of (Bhabha and Rao), 9.
Mesons, neutral, note on the correspondence between the classical and quantum theories (Bhabha), 249.
Metallurgy, ancient Indian, investigations (Paramasivan), I, II, 87.
Metric, on the existence, for path spaces admitting the Lorentz group (Shabbar), 203.
Micro-Kjeldahl method, adaptation, to the estimation of nitrogen in organic compounds containing nitro and azo groups (Bhat), 269.
Naphthalene series, studies, VI (Desai and others), 33; VII (Desai and Waravdekar), 39; VIII, IX (Desai and Hamid), 126, 132.
Paper pulp from annual crops, II (Murti), 564.
Photoelectric efficiency of ferromagnetic metals at different temperatures in the soft X-ray region (Rao and Iyer), 411.
Polycyclic systems, substitution, II (Ananthakrishnan and Pasupati), 211.
Pyrilium salts derived from 4-O-methyl resorcylic aldehyde (Row and Seshadri), 510.
Quartz ultrasonic oscillators, on the preparation (Bajpai and Vaidhianathan), 504.
Raman effect in gypsum (Rao), 137.
Raman effect in naphthalene and benzophenone, effect of crystal orientation (Nedungadi), 161.
Raman effect in relation to crystal structure: Lattice oscillations (Bhagavantam), 543.
Raman frequency of diamond, temperature variation (Nayar), 284.
Raman lines in carbon dioxide, the intensities (Nath and Chalam), 339.
Raman lines in crystals, relative intensities of Stokes and anti-Stokes (Venkateswarlu), 64.
Raman spectrum and the specific heat of crystalline sulphur (Norris), 291.
Raman spectrum of gypsum (Saksena), 25.
Ramanujan, some idiosyncratic numbers (Gupta), 519.
Rectification in discharge tubes, II (Chiplonkar), 323.
Rectifying properties of Cu-Cu_2O cells, effect of admixture of silver (Dixit), 498.
Reflection by a regularly stratified medium, the spectral character, I (Subrahmanian), 467.
7-hydroxy-5-methyl coumarin, synthesis (Rao and Seshadri), 255.
Sum function connected with primitive roots (Pillai), 526.
Sympathomimetics, group, synthetical experiments, II (Rajagopalan), 566.
Thermal conductivity of Indian timbers, I (Narayanamurti and Ranganathan), 300.
Thermal repulsion, studies (Ramdas and Joglekar), 374.
Ultrasonic velocity, dispersion, in organic liquids (Krishnan), 281.
Waves, attenuated, reflection and refraction, in semi-infinite elastic solid media (Seth), 151.
X-rays, modified reflection: Naphthalene (Bhagavantam and Bhimasenachar), 266.
